YOUR HOLINESS IS BEAUTIFUL

```
J = 96
        How wondrous is Your presence Lord
VERSE 1
        Too awesome to behold
              Em D
                       G/B
        The seraphim must turn away
        The angels are not bold
                           G/B C
        For who can bear the brightness of
                             Dsus D
        Your holy dwelling place
                             Am7
        Yet by the blood that Jesus shed
                          C/E
                               D/F#
        I dare to lift my gaze
              Gsus G
                          Am/E Em7
                                            Dsus D
        Your holiness is beautiful oh Lord
CHORUS
                          Am/E Em7
        Your holiness is beautiful my glorious Lord
                                     Em7
        I see You now by faith, but soon Lord face to face
        Your holiness is beautiful my Lord
                                                C
                      G/B C
        I long to see Your splendor Lord
VERSE 2
        You've burned it in my heart
                                   G/B
                                                               B
                                          Аm
                                                          Bsus
        My hunger won't be satisfied to worship from afar
                             G/B C
        Oh cause Your face to shine on me
                             Dsus D
        And take the veil away
                      D/F# G
                             Am7
        And then my joy will be complete
                          C/E
                                D/F#
        I'll sing eternal praise
```
